Company Profile

Boai NKY Pharmaceuticals Ltd. (NKY, stock code: 300109) was the first domestic company to develop and manufacture polyvinylpyrrolidone (PVP) series products in China. With more than 26 years' experience in PVP production coupled to a dedicated commitment to quality improvement and management, NKY has become the largest Chinese producer of PVP's and third largest globally.

In April of 2013, construction of NKY's new plant with 138,800M² of land and 50,000 M² of structure was completed, making it the production center of our PVP and PVM/MA polymer families. The new facilities include production capacities of : 12,000 tons/year GBL; 6,000 tons/year 2-pyrrolidone; 6,000 tons/year NVP; 2,500 tons/year PVM/MA copolymer; 2,000 tons/year MVE and 10,000 tons/year PVP's.

Our product offerings include: GBL, 2-P, NVP monomer, PVP K Series, Copovidone, VP/VA copolymer series, PVPP, PVP-I complex, vinyl ether intermediate and PVM/MA copolymers. NKY is the only domestic company capable of manufacturing PVP K-12 (powder and liquid) and PVP K-60, K-90 and K-120 powders.

All pharmaceutical, cosmetic, food and oral care products are manufactured according to cGMP regulations in the new facilities, making a model to China's excipient/food additive's production safety management.

With the establishment of the R&D Center in Boai and the Technical Research Center in Tianjin, NKY is committed to R&D and the development of new products and technologies to bring new solutions and value to their customers. We are continuously striving to become the most trusted partner to our customers by providing materials that meet their quality requirements and enhance their finished product's performance.

The company continues to develop new technologies and capabilities to better serve its market as can be attested by the many company patents and distinctions. Recently, NKY has been awarded the distinction as National Torch Plan High-Tech Company, qualifying the company as a State-Level High-Tech enterprise. On a provincial level, our technical R&D center has been qualified as a Jiaozuo innovation center and our company as an environmentally responsible enterprise.

We provide high quality medicinal excipient for our customers in more than 60

countries world-wide. Polyvinylpyrrolidone (PVP) series products of NKY are widely used in the pharmaceutical field as excipients, suitable for a broad range of dosage forms.

NKY has and will always strive to deliver the highest quality products to our customers. NKY is continuously updating and implementing the best technology to manufacture our products, improving and updating our quality management systems and investing in our R&D capabilities.

NKY has been a supplier of PVP-based excipients to the pharmaceutical industry. Presently, NKY offers the complete range of PVP excipient products to the global pharmaceutical market. All our products are of the highest quality and meet all regulatory specification. In addition, our comprehensive technical support group, our continuing updated quality management system and meticulous after-sales service allows our customers the peace of mind that they have chosen the right partner for their material needs.

NKY is committed to the development of new pharmaceutical excipients and new innovative preparation techniques to provide new solutions and extra value for our customers. We will continue to work diligently to build our presence in the pharmaceutical industry. It is our mission to not only stay a dependable supplier of high quality pharmaceutical products, but to become a trusted partner that global pharmaceutical companies will want to work with in developing new opportunities and growth.
